

Infor PM 10 for System i

“ The software automates so many of our monthly reporting processes that it gives us more time to spend on analysis as well as the ability to quickly respond to management inquiries. ”

RENEE MARTIN, MANAGER, CORPORATE ACCOUNTING, VF CORPORATION

Do business better with performance management.

Without a dedicated system for performance management (PM), manufacturers on System i® platforms find themselves reacting to, rather than proactively managing, their operational and financial performance. Increased competition, downward pricing pressure, rising commodity and energy costs, regulatory mandates, and customer demands for rapid turnaround make it harder for manufacturers to improve revenue and profitability. Like many manufacturers, you may be using outdated, spreadsheet-based approaches to report and analyze operational and financial data. But your familiar, reliable System i platform can help you get the most out of the right PM solution. By augmenting your existing investment in System i with Infor™ PM 10, you'll improve reliability and security while achieving even lower total cost of ownership.

Leverage experience.

Infor PM 10 helps you monitor, measure, and manage your business performance in real time to improve competitive advantage. With Infor, you can harness your data—wherever it resides—to better understand your business environment, streamline and improve the effectiveness of your business processes, and prepare options for competing successfully. With Infor's proven, best-practice methodology guiding the process, your implementation will be smooth, fast, and accurate, reducing the time necessary to see a return on investment and ensuring a low total cost of ownership. Infor delivers business-specific solutions with experience built-in, and provides the most out-of-the-box functionality of any enterprise software vendor—reducing the need for time-consuming customizations. Our solutions are implemented by domain experts whose skills and knowledge are unmatched in the manufacturing industry and the System i platform, further reducing implementation time.

INFOR™

Get business specific.

Infor PM 10 improves operational and financial performance by giving you a clear line of sight from strategy to execution. Plus, Infor PM 10 allows you to start with any aspect of PM and then expand into other areas as your business needs change or your business grows. Infor PM 10 solutions help you:

- **Link strategic plans to operational plans,** performance measures, and people. You gain an intuitive, visual method of reporting on how the actions of operating units and individuals are contributing to the success of strategic goals. Not only will you understand the business events and source of revenue in a given period, but you'll also gain a clear picture of how well your strategic plan was implemented.
- **Create budgets.** Easily generate and compare multiple "what if" scenarios, test assumptions, assess the impact of events, and model your business to meet targets and high-level objectives. Because Infor PM's Microsoft® Excel® interface sits on top of a single database, you retain the familiar look and feel of spreadsheets, but eliminate problems with accuracy and version control.
- **Generate statistically accurate forecasts** that help you manage performance expectations, make tactical adjustments, and achieve performance goals. You can generate rolling forecasts, check the accuracy of submitted plans, and receive automatic alerts that allow you to easily spot—and solve—issues as soon as they arise.
- **Enhance financial consolidation and reporting.** Improve corporate accountability, increase financial transparency, and meet government-mandated reporting deadlines confidently. You can collect, process, report, and analyze data in multiple currencies, as well as report on the effects of currency fluctuations. Plus, you can consolidate data according to local and international standards. You can also automate the generation, formatting, and distribution of book-quality financial statements and management reports. In addition, you can compare actual numbers against budgets and forecasts, drill down into details, evaluate trends, and see the results of currency fluctuations.

See results now.

With Infor PM 10, you can gain fast ROI and achieve low total cost of ownership through:

- Aligned goals and resources
- Improved data integrity and quality
- Shortened process cycle times
- Enhanced operational insight
- Improved business agility and responsiveness
- Strengthened process and compliance controls
- Increased financial transparency; time for analysis

Infor's evolutionary solution development helps you:

- Protect and leverage your current IT investment.
- Enjoy a lower total cost of ownership.
- Benefit from solutions that will evolve with your business.
- Implement new solutions at your own pace.

About Infor.

Infor acquires and develops functionally rich software backed by thousands of domain experts and then makes it better through continuous innovation, faster implementation options, global enablement, and flexible buying options. In a few short years, Infor has become one of the largest providers of business software in the world. For additional information, visit www.infor.com.
